Infection effect on chytrid gene expression absence of MET NS Log₂ FC p –value and log₂ FC

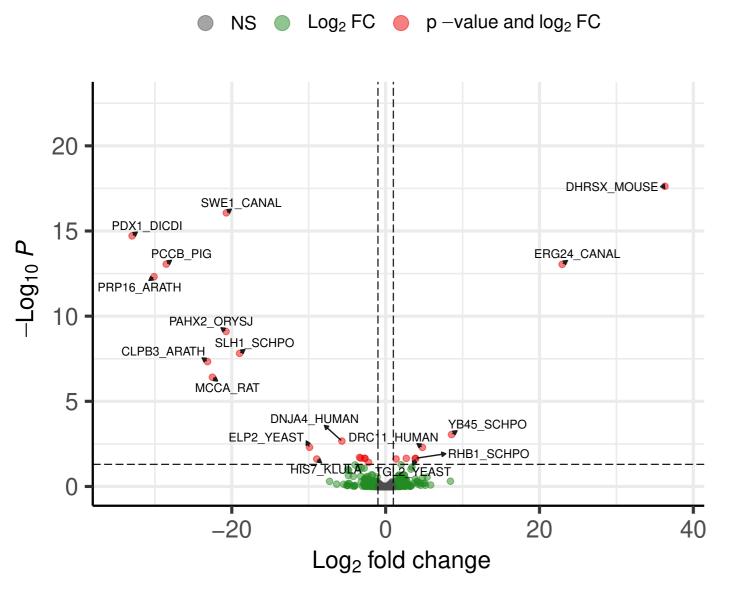

total = 1336 variables

Infection effect on chytrid gene expression presence of MET

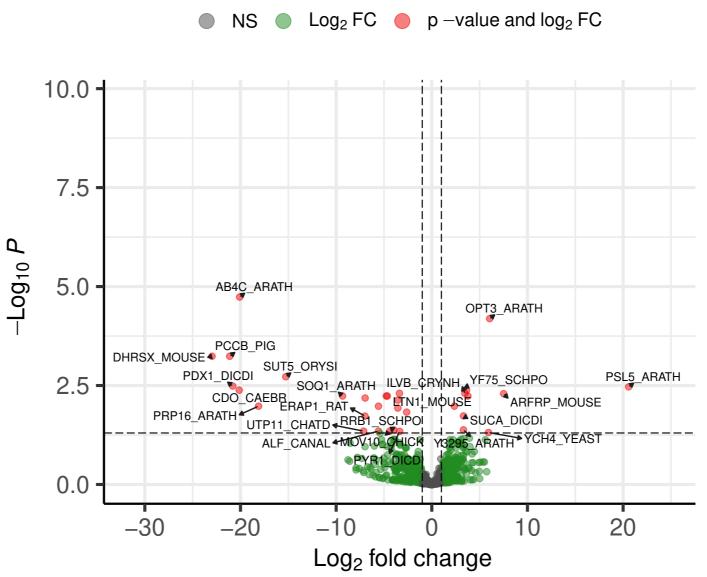

total = 1336 variables

MET effect on chytrid gene expression free-living zoospores

d MET effect on chytrid gene expression during infection

total = 1336 variables total = 1336 variables

Number of genes differentially expressed in the four pairwise comparisons
